

Thesis title

Faes E. Mertens de Wilmars S. Pratesi F.

Antwerp Management School

A thesis submitted for the degree of

Master in Finance

June 2021

For Yihui Xie

Acknowledgements

First of all, many thanks to our families and loved ones that supported us during the writing of this thesis. Secondly, thank you professors Zhang, Annaert and De Ceuster for the valuable insights you have given us in preparation of this thesis and the many questions answered. We must be grateful for the classes of R programming by prof Zhang. \

We must also be grateful to John Gruber for inventing “Markdown”, to John MacFarlane for creating “Pandoc” which converts Markdown to a large number of output formats, and to Yihui Xie for creating “knitr” which introduced R Markdown as a way of embedding code in Markdown documents, and “bookdown” which added tools for technical and longer-form writing. \

Special thanks to Chester Ismay, who created the “thesisdown” package that helped many PhD students write their theses in R Markdown. And a very special thanks to John McManigle, whose adaption of Sam Evans’ adaptation of Keith Gillow’s original maths template for writing an Oxford University DPhil thesis in “LaTeX” provided the template that Ulrik Lyngs in turn adapted for R Markdown, which we also owe a big thank you. Without which this thesis could not have been written in this format. \

Finally, profuse thanks to Allaire, the founder and CEO of RStudio. Thanks for making data science easier, more accessible and more fun for us all.

2 Empirical Findings	3
2.1 Main analysis title	3
3 Robustness Analysis	4
Conclusion	5
More info	5
Appendices	
A Appendix	8
Works Cited	9

List of Figures

List of Tables

List of Abbreviations

- 1-D, 2-D** . . . One- or two-dimensional, referring in this thesis to spatial dimensions in an image.
- Otter** One of the finest of water mammals.
- Hedgehog** . . . Quite a nice prickly friend.

Introduction

Here comes text...

1

Literature review

Here is a simple introduction of this part of our thesis

2

Empirical Findings

2.1 Main analysis title

Here comes our main part

3

Robustness Analysis

*Alles Gescheite ist schon gedacht worden.
Man muss nur versuchen, es noch einmal zu denken.*

*All intelligent thoughts have already been thought;
what is necessary is only to try to think them again.*

— Johann Wolfgang von Goethe (von Goethe 1829)

Conclusion

If we don't want Conclusion to have a chapter number next to it, we can add the `{-}` attribute.

More info

And here's some other random info: the first paragraph after a chapter title or section head *shouldn't be* indented, because indents are to tell the reader that you're starting a new paragraph. Since that's obvious after a chapter or section title, proper typesetting doesn't add an indent there.

This paragraph, by contrast, *will* be indented as it should because it is not the first one after the 'More info' heading. All hail LaTeX. (If you're reading the HTML version, you won't see any indentation - have a look at the PDF version to understand what in the earth this section is babbling on about).

Appendices

Appendix

Works Cited

Von Goethe, Johann Wolfgang (1829). *Wilhelm Meisters Wanderjahre oder die Entsagenden*. de. Cotta.
